---

The report builds on experience and lessons from the U.S. Department of Energy"s (DOE) National Renewable Energy Laboratory (NREL) in supporting the Miramar microgrid project ...

This paper deals with the design of an advanced optimal strategy to enhance power management and frequency control in marine microgrids. The investigated ...

The goal of this thesis is to investigate the feasibility of operating microgrids in marine vessels. Power management strategies are formulated with integration of energy storage and renewable sources, ...

Framework and methodology for integrating ocean wave power into maritime microgrids is demonstrated. Feasibility of wave power to augment and complement solar powered microgrids is ...

After seven years of development, the microgrid at Marine Corps Air Station (MCAS) Miramar near San Diego has achieved yet another milestone with the ...

The Port of San Diego initiated the Tenth Avenue Marine Terminal (TAMT) Microgrid - Resiliency in Terminal Operations project in 2016 with the objective ...

Marine energy researchers leverage NLR"s deep experience and broad capabilities in microgrid research to support the effective utilization of marine energy in a wide range of power ...

Maritime Microgrids: System Architectures, Energy Efficiency, Power Quality and Regulations.

Energy Independence - Electrification, coupled with renewable generation and storage (e.g., microgrids), can provide localized energy to ports and benefit national security.

Solution: To mitigate these challenges, FHL began developing a long-term strategic plan for an installation-wide Solar & Battery powered microgrid to achieve mission resilience. FHL"s success ...
