312 A bit of explaining as to what that %20 is : The common space character is encoded as %20 as you noted yourself. The % character is encoded as %25. The way you get ...

Discover how to insert line breaks in email subjects using HTML, similar to how %20 represents a space. Explore solutions and examples.

Depending on your point of view, that's not quite correct. %20 represents a space, but & nbsp; represents a non-breaking space, technically a separate character. So even if it were a good ...

@MetaByter I think it is more technically correct to phrase the question as &quot;In a URL, should I encode the spaces using %20 or + in the query part of a URL?&quot; because while the example you show ...

As the aforementioned RFC does not include any reference of encoding spaces as +, I guess using %20 is the way to go today. For example, &quot;%20&quot; is the percent-encoding for the binary ...

Sometimes the spaces get URL encoded to the + sign, and some other times to %20. What is the difference and why should this happen?

I am interested in knowing why "%20" is used as a space in URLs, particularly why %20 was used and why we even need it in the first place.

How do I replace all the spaces with %20 in C#? Asked 16 years, 4 months ago Modified 1 year, 4 months ago Viewed 142k times
