EIA projects that PV's growth in 2023 (27 GWac) and 2024 (36 GWac) will continue in 2025 (39 GWac) and remain at similar levels in 2026 (36 GWac). In 2024, 24 states and territories ...

Tesla bringing back solar panel production to its Buffalo factory in 2025 would mark an interesting full-circle milestone for the storied plant, which ...

From California to New England, construction of solar energy is picking up speed, showing promise for hitting sustainability goals. In this article, ...

Discover how solar energy innovations in 2025 are transforming power with advanced panels, storage, and smart technologies.

The year 2025 marks a pivotal moment for renewable energy, with Solar Panel Innovation leading the charge. As technology advances, solar ...

Discover cutting-edge solar PV module innovations of 2025 including perovskite, TOPCon, HJT, bifacial, and IoT-integrated panels.

From pv magazine USA First Solar said in its third-quarter 2025 earnings report that it will open a new 3.7 GW annual-capacity solar module ...

Discover key solar energy trends in 2025, from storage growth and bifacial panels to community solar and AI integration.

Wood Mackenzie projects 197 GWdc of new utility-scale solar to be built between 2025 and 2030, but uncertainty remains due to the Department of Interior's memorandum on permitting ...

A deep dive into the titans of the solar photovoltaic industry, from module manufacturing to grid intelligence.

2025 New solar Module Projects

Discover the leaders shaping the energy transition.
