Their manufacturing uses high-purity lithium and refined battery minerals, supported by strategic partnerships, meeting military and aerospace standards. ALE holds ...

We are designing an internally-developed processing train for the manufacturing of battery cathode grade lithium hydroxide from our Nevada-based sedimentary claystone resources near Tonopah.

Building a robust and sustainable lithium battery manufacturing base in the United States will require addressing a number of challenges that have depressed investment in the domestic lithium battery ...

In April 2021, NAATBatt funded NREL to develop a database of companies that supply goods, equipment, and services to process, manufacture, or recycle high-voltage lithium-ion materials, cells, ...

The database features companies within the following Li-ion battery supply chain segments as well as support facilities, such as equipment manufacturing and research.

Imports of lithium-ion batteries and battery parts from China to the United States grew at accelerated rates into the 2020s. Manufacturers in China captured market share partly because of ...

At our state-of-the-art facility in Atoka, Oklahoma, we transform spent lithium-ion batteries into high-quality cathode and anode materials, ready to be used by ...

American Lithium Energy (ALE) is shipping the world's highest energy density silicon-based lithium-ion batteries with industry best safety and zero-volt stability.

American Lithium Energy Corporation delivers next-generation lithium battery technology engineered for safety, performance, and reliability across defense, aerospace, and energy sectors
