---

The EU solar sector continues its upward trajectory, with mid-2025 figures confirming robust growth. SolarPower Europe's latest analysis highlights ...

solar market and power consumer. As part of the record-breaking solar generation volumes achieved in the EU in June 2025, solar reached a 30% share of monthly electricity generation

Wind and solar generated more EU electricity than fossil fuels for the first time in 2025, driven by a massive surge in solar power.

The EU Market Outlook for Solar Power: 2025 Mid-Year analysis is the first of our reports of its kind. The publication provides a brief market snapshot and outlook for the rest of the year.

In the European Union, in 2023, about one-quarter of the EU electricity supply was met by imported fossil fuels, and without wind, solar PV and bioenergy, this ...

According to the International Renewable Energy Agency (IRENA), in 2023, Europe's solar PV installed reached 285.80 GW, with a growth rate of ...

The Europe solar PV market size crossed USD 63.1 billion in 2024 and is set to register at a CAGR of 7.1% from 2025 to 2034, due to the growing focus on ...

Europe's electricity transition takes crucial strides forward as it took major steps forward. The EU's electricity generation in coal, gas and emissions. Fossil fuels dropped by a record 19% to their lowest ever level ...

Solar remained the EU's fastest growing power source in 2024, rising above coal for the first time. Wind power remained the EU's second largest power source, above gas and below ...

The EU needs to boost power demand through electrification to achieve its energy transition and energy security goals. As the discussions in Bilbao made clear, solar power now ...
