China continued to dominate the global market, representing ~60% of 2024 installs, up 52% y/y. The rest of the world was up 11% y/y. The IEA reported Pakistan's rapid rise to fourth place ...

Solar panels are the most critical part of the solar energy system as it is responsible for converting solar energy into electrical energy. There are different types of ...

NLR analyzes the total costs associated with installing photovoltaic (PV) systems for residential rooftop, commercial rooftop, and utility-scale ground-mount systems. This work has grown ...

The Global Market Outlook for Solar Power 2025-2029 is SolarPower Europe's flagship annual publication, delivering the most authoritative analysis of solar market trends worldwide.

As new development opportunities for traditional community solar continue to decline, community solar developers report increased interest in exploring community-scale solar and storage ...

Our study defines the global solar energy market as all grid-tied and certified off-grid photovoltaic (PV) and concentrated solar power (CSP) plants ...

The IEA PVPS Trends in Photovoltaic Applications 2025 report provides comprehensive data and analysis on global PV deployment, technology, and ...

The North America solar PV market was valued at USD 45.4 billion in 2025 and is projected to grow at a CAGR of 6.3% from 2026 to 2035, driven by rising ...

Lawrence Berkeley National Laboratory compiled and synthesized empirical data on the U.S. utility-scale solar sector.
