The goal of this work is to analyze data collected by the Al-Rashidiya meteorological station to predict the performance of solar PV modules (NT-R0E3E-SHARP) in this geographical area.

In the present study, researchers examined a solar off-grid-connected photovoltaic system for a family house in the city of Baghdad. The design was created with the help of the "How ...

In the review, references were used by several aunts in this research field, and all studies confirmed Baghdad's willingness to use solar applications such as heating water for home use.

Iraq is finally proceeding with the country's first big solar power plant. The Baghdad government has stepped up the effort to adopt a more ...

Solar electricity has the highest efficiency amongst all forms of renewable energy. This study examines the monthly grid performance of a hypothetical 100 MWp solar facility linked to the Al-Khwarizmi ...

With the result of the cost calculations done for the cities, it's found out that photovoltaic solar power panel systems that cost 9628 \$ in Baghdad are good enough to fulfill.

Therefore, this study concentrates on creating a detailed design study for a solar project using LiDAR point clouds. The outcomes will be used to propose the best orientation for solar plants ...

Renewable types of energy, especially solar energy, have increased rapidly in recent years and have become an important source of power generation in developed and developing countries.

So far, we have conducted calculations to evaluate the solar photovoltaic (PV) potential in 36 locations across Iraq. This analysis provides insights into each city/location's potential for harnessing solar ...
