Discover all statistics and data on Battery storage industry in Europe now on statista !

In 2025, European Union member states installed 27.1 GWh of new battery energy storage capacity--a 45% increase over 2024--marking the twelfth consecutive year of record ...

This is an extract from a recent report "EU Battery Storage Market Review 2025" published by SolarPower Europe. EU annual BESS installed capacity 2025 In 2025, battery storage ...

The EU installed a record 27.1 GWh of new battery storage capacity in 2025, driven by utility-scale projects that accounted for over half of new additions as the bloc races to build the ...

Our five-year outlook foresees significant BESS expansion in Europe - a sixfold increase to nearly 120 GWh by 2029, driving total capacity to 400 GWh, yet falls short of energy transition needs.

EU battery cell manufacturing capacity was 252 GWh in 2025 and over 90% of capacity is directed at electric vehicles rather than stationary storage, according to SolarPower Europe.

27.1 GWh of new battery capacity installed in 2025, marking the EU's 12th consecutive record year for battery storage deployment. 55% of all new capacity came from utility-scale systems, ...

Battery storage deployment in the European Union soared by 45% in 2025 to 27.1 GWh largely driven by growth in utility-scale batteries, according to a recent report by industry group ...

The EU installed a record-breaking 27.1 GWh of new battery energy storage system (BESS) capacity in 2025, with Germany and Italy topping the chart again, while Bulgaria emerged as ...

According to the report, total operational battery storage capacity in the EU reached 49.1 GWh by the end of 2024. Across greater Europe, the figure ...
