-----

Berlin, 02.09.2021 - Solar panel manufacturer OPES Solutions and Fraunhofer Center for Silicon Photovoltaics CSP have developed a flexible standard solar ...

We are developing the next generations of sustainable silicon solar cells and modules, along the entire value chain and from proof-of-concept to industry ...

Our solutions help clients independently verify quality, reliability, and performance on PV modules, inverters, BESS, and transformers across the global renewable ...

DKE project: Energy Rating Development of standards for evaluating the energy yield of photovoltaic modules

By combining advanced strategies for materials properties management, with customized modules design in a circular economy approach, two types of products will be developed including flexible PV ...

What are lightweight photovoltaic modules? Lightweight photovoltaic modules, unlike conventional photovoltaic modules, are manufactured without glass, using a plastic base. This makes them not ...

We will develop scalable, industrially compatible (monolithic 2 terminal) high voltage tandem perovskite/CIGS solar cells and modules on flexible ultra-thin glass, steel and poly-imide substrates.

Project description SolMates aims to provide a novel industrial, scalable technology for producing flexible, durable, made-to-measure, two-terminal CIGSe/perovskite multijunction thin-film PV modules.
