Terrament is a New York based clean-tech startup building a patented long-duration energy storage solution that reimagines gravity storage. Our technology ...

The world's largest and highest-altitude pumped storage power station under construction has reached two major milestones in western China's Sichuan Province. On 22 February, excavation ...

Compressed-air energy storage, a decades-old but rarely deployed technology that can store massive amounts of energy underground, could soon see a modern rebirth in California's ...

As renewable energy adoption skyrockets, the need for innovative storage solutions like energy storage power stations buried in the pit has never been more urgent. These underground ...

This project aims to help transition from fossil fuels to renewable energy, maintaining power supply even when solar and wind aren't available. The technology stores excess energy by ...

The utilization of Underground Pumped Storage Power Systems (UPSP) addresses the growing need for energy storage in the face of increasing intermittent energy sources.

Team member Renewell Energy has invented a method of underground energy storage called Gravity Wells that will give a second life to ~\$4 trillion worth of inactive upstream O&G ...

Over here in the US, the Energy Department is also supporting the development of a new, compact underground powerhouse that can fit into a slim ...

On February 22, 2026, the Yalong River Lianghekou Pumped-Storage Power Station in Yajiang County, Sichuan Province, China, identified as the world's largest hybrid pumped-storage ...

The new technique, called Underground Gravity Energy Storage (UGES), proposes an effective long-term

Buried energy storage power station

energy storage solution while also ...
