At its core, the project uses lithium-ion batteries bigger than your neighbor's swimming pool--300 megawatt-hours of storage capacity to be exact. But here's the kicker: it's paired with AI-driven load ...

In the latest development on that score, Dongfeng Motor Company just rolled out 50 demonstration cars sporting solid-state EV battery technology, though their iteration is part solid, part liquid.

The world's first solid-state battery, announced by Donut Lab, has sparked interest for its potential advancements over traditional lithium-ion technology. While marketed as a breakthrough in ...

Let's talk about Donut Lab's solid-state batteries. When a company claims to have created what's essentially the holy grail of batteries, there are bound to be some questions. Interest has ...

Donut Lab has created the world's first production solid-state battery to be used in electric vehicles, and its first tests have yielded some incredible results. Solid-state batteries have been ...

At CES, Donut Lab presented a solid-state battery allegedly ready for mass production. However, the impressive specifications prompted critics to question the results. Donut has now ...

Technology company Donut Lab has published the results of the first measurements analysing the features of its solid state battery. The tests, conducted by Technology Research Centre ...

Experts still have big questions--about cycle life and performance at the pack level. Donut Lab is releasing more evidence of its solid-state batteries, but there's no word on the chemistry just yet.

If batteries were coffee makers, Cairo Solid State Battery Energy Storage Company would be the barista crafting a triple-shot espresso. The energy storage game is heating up, and this Egyptian innovator is ...

Donut Lab's solid-state battery sure looks like the savior for electric cars.
