Ener-G-Africa (EGA), an African company tackling the challenges of climate change through clean energy, officially launched a new 15MW per annum women-led solar panel assembly plant in Cape ...

Eskom BESS rollout project is the largest to be implemented in Africa. This is a direct response to the urgent need to address South Africa's long running ...

As global demand for sustainable energy solutions surges, Cape Town's new energy storage battery factory is emerging as a game-changer. This article explores how this facility bridges renewable ...

Cape Town is on track to become the first city in South Africa to own and operate a solar power plant, marking a significant move towards energy ...

This article has explored the technological progress, promising opportunities, and key challenges linked to the deployment of SIBs in grid energy storage and fast-charging electric vehicle infrastructure.

With rolling blackouts affecting 200+ days annually [1], South Africa urgently needs solutions like the Cape Town Energy Storage Power Station. This 200MW/800MWh facility - one of Africa's largest ...

This initiative aims to explore cost-effective, sustainable energy storage solutions tailored to South Africa's unique energy needs and mineral landscape. Sodium-ion batteries have emerged as a ...

This project aims to decommission one of South Africa's oldest coal-fired power plants and replace it with 220 MW solar PV and wind power, as well as 150 MW battery storage.

In Provincetown, the \$49-million, 25-megawatt lithium-ion Battery Energy Storage System (BESS) could not relight the grid due to "the extensive damage that has been sustained both on the ...
