-----

Clean Energy February 18, 2026 New York, February 18, 2026 - Clean power costs sent mixed signals in 2025. According to BloombergNEF's Levelized Cost of Electricity 2026 report, the ...

DOE's Energy Storage Grand Challenge supports detailed cost and performance analysis for a variety of energy storage technologies to ...

Energy storage system prices have fallen to their lowest level on record, dropping to a global average of \$117/kWh in 2025. The new ...

Prices are falling faster than expected, grid-scale storage has already blown past its 2025 deployment target, and new mega-projects announced today--from the U.S. to Angola ...

Global average prices for turnkey battery storage systems fell by almost a third year-over-year, with sharp cost declines expected to ...

BloombergNEF's LCOE report shows four-hour battery storage costs fell 27% to \$78/MWh in 2025, a record low since 2009, driven by lower pack prices and design advances, ...

In this work we describe the development of cost and performance projections for utility-scale lithium-ion battery systems, with a focus on 4-hour duration systems. The projections are ...

In 2025, the average energy storage cost ranges from \$200 to \$400 per kWh, with total system prices varying by technology, region, and ...

Despite an increase in battery metal costs, global average prices for battery storage systems continued to tumble in 2025.
