New project: Cartesian will deliver a cold thermal storage unit to the Technical University of Denmark (DTU) in Copenhagen. The Thermal Box will be installed in the cooling system of a data ...

This joint venture manifested itself in a subterranean cavity lined with a plastic membrane and a sealed lid on top. While Denmark already features ...

The project utilizes Copenhagen's Nordhavn as a full-scale smart city energy lab and demonstrates how electricity and heating, energy-efficient buildings and electric transport can be integrated into an ...

We are happy to announce that our Everspring projects have reached final investment decision (FID). With a total storage capacity of 132 MWh, the projects now claim the (unofficial) title as...

Since 2015, EnergyLab Nordhavn has developed solutions and methods for sustainable and flexible energy systems in the cities of the future. This has been done in close collaboration between ...

From Copenhagen's wind farms to Aarhus' smart factories, Danish-designed container cabinets offer plug-and-play efficiency that traditional systems can't match.

This technology catalogue contains data for various energy storage technologies and was first released in October 2018. The catalogue contains both existing technologies and technologies under ...

Danish renewable energy developer Copenhagen Energy has hired local company Energrid to build a portfolio of battery energy storage projects ...

European energy player E.ON has formally launched a carbon capture and storage (CCS) project in Copenhagen, aiming to capture 400,000 ...

Copenhagen's new energy storage cabinet

When a 2022 cold snap froze wind turbines, the city's thermal storage facilities saved the day by releasing heat from summer-stored excess energy. Talk about a seasonal plot twist!
