---

The dodo (*Raphus cucullatus*) was a flightless bird endemic to Mauritius in the Indian Ocean. Driven to extinction by the late 1600s, it was killed off by human activities, including ...

Dodo, extinct flightless bird of Mauritius, one of the three species that constituted the family Raphidae.

The dodo, with its weird looks and mythical nature, became the first high-profile case of extinction in the animal kingdom and perhaps triggered our earliest research into the damaging effects on our ...

Since last being sighted in 1662, the dodo has become the symbol of extinction. But despite its fame, astonishingly little is known about this large, flightless bird.

The dodo was a large, flightless pigeon relative that lived only on Mauritius in the Indian Ocean. It became an emblematic example of human-driven extinction after the island's colonization ...
