-----

In March 2025, the Commission launched the European Energy Storage Inventory, a real-time dashboard that displays energy storage levels ...

From high-efficiency thermal storage for CSP plants to eco-friendly battery alternatives, StorageNext covers the real science behind the headlines and why it matters.

EASE is actively shaping the legal and R& D funding framework for energy storage at EU level. Members gain direct influence in the European decision-making process.

This position paper assesses the system value of long-duration energy storage, identifies barriers to deployment, and proposes recommendations to better align European energy, industrial, and ...

Discover the evolving policies and regulations of the European Union and United Kingdom, with both issuing landmark legislation in the energy storage.

A new interactive platform--the European Energy Storage Inventory --has been launched to provide near real-time insights into energy storage ...

The European Commission says it will introduce an energy storage package in 2025, as outlined in a new report on progress by member states ...

European Union (EU) countries have made limited progress in implementing recommendations on energy storage deployment and electricity network flexibility.

The Coalition aims at accelerating the decarbonisation of the European energy system by increasing the deployment of sustainable and clean energy storage solutions to support renewables.

We consider three storage technologies, namely battery, pumped hydro, and hydrogen storage, and quantify

# EU Clean Energy Storage System

the impact of modeling the European electricity system with different spatial ...
