Engineers at Monash University believe they have developed a water-based energy storage technology that will bring flow batteries into homes around Australia.

Flow Power has reached financial close on its 100-MW/223-MWh Bennetts Creek battery energy storage system (BESS) project in Victoria's Latrobe Valley, the Aussie renewables developer ...

Enter flow batteries --a homegrown technology that could reshape Australia's energy future. Unlike lithium-ion batteries, which max out at four to six hours of storage, flow batteries can ...

Wärtilä delivers 100MW battery energy storage system for Flow Power in Victoria, Australia, to support the renewable energy transition.

Flow Power, a prominent player in Australia's renewable energy sector, has reached a pivotal milestone by closing financing for its inaugural Battery Energy Storage System (BESS) project.

Flow batteries are the likely to be one of the most commercially-viable technologies for long-term energy storage in Australia. Vanadium redox flow batteries are ...

Renewable energy generator and retailer Flow Power has achieved financial close on a 100MW/223MWh battery storage project in Victoria, Australia.

What is a flow battery and how does it work? Learn more about our vanadium flow battery technology at StorEn Technologies.

Renewables developer and electricity retailer Flow Power has reached financial close on its Bennett's Creek battery energy storage project ...

Learn more about Bennetts Creek Battery, Flow Power's largest grid-scale BESS project helping stabilise
