Hawaii is coming closer to its renewable energy goals with the commercial operation of a solar-plus-storage project on the island of Hawaii.

Consisting of 28 megawatt (MW) solar photovoltaic (PV) and a 100 MWh five-hour duration energy storage system, the project provides peak capacity from the sun and allows the island to ...

The project, located on Hawaii Island, integrates 30 MW of solar photovoltaic capacity with 30 MW/120 MWh (4 hours) of battery storage, ...

The procurement process applies only to Hawaiian Electric's service areas on O'ahu, Maui, and Hawai'i Island, and describes the ...

The energy produced is expected to power nearly 14,000 homes, said Sandra Larsen, AES Hawaii market business leader. The solar farm is the ...

Hawaiian Electric Companies recently submitted plans for seven new solar-plus-storage plants to the Hawaii Public Utility Commission, totaling 262 MW of solar photovoltaics (PV) coupled with battery ...

The project's energy storage system is improving the reliability of the island's power grid while providing low-cost clean energy to customers when they need it.

Kauai Island Utility Cooperative (KIUC) has partnered with renewable energy providers to transform the island from an oil-dependent and expensive electricity market to a global leader in ...

The new Hoohana Solar project started commercial operations on July 11, 2025, marking the completion of the first stage of grid-scale renewable energy systems brought online through a ...
