For 100 cows, this is nearly 9 tons and 9+ cubic yards of manure per day. For cows on pasture part-time, manure handling and storage needs would ...

Introduction
 General Requirements of The Nutrient Management Act For Liquid Manure Storages
 Types of Liquid Manure Storages
 Dealing with Existing Storages
 Sizing Liquid Manure Storages
 Siting of New Or Expanding Storage
 Comparing Under-Barn to Outside Storage
 Covered Or Open-Top Storage
 Transfer Systems
 Preventive Maintenance
 To ensure a level of protection for surface and groundwater, evaluate existing liquid manure storage structures regularly. Repair urgent problems immediately. In most cases, this may mean hiring an engineer or a qualified third party to ensure that the repair is completed properly. See more on [ontario.ca/b_ans](https://www.ontario.ca/b_ans)
