Find up-to-date statistics and facts on the global solar photovoltaic industry.

Zimbabwe have so much potential to meet all its energy needs from Renewables. Estimated potentials are as follows according to literature Solar PV - 109GW Concentrated Solar Power (CSP) - 40GW ...

Well, here's the kicker - there's no single right answer. The project uses three distinct grouping methods simultaneously, balancing terrain challenges with energy output requirements.

We've looked at the 15 biggest solar farms in the world right now, examining capacity, total investment, and the future of solar power worldwide.

A global inventory of utility-scale solar photovoltaic generating units, produced by combining remote sensing imagery with machine learning, has identified 68,661 facilities -- an ...

Most homeowners need between 15-25 solar panels to power their entire home, but this number varies significantly based on your energy usage, ...

The University of Louisiana, Lafayette found that, in 2023, solar supported over 600,000 total jobs, when accounting for indirect jobs (created by business to business transactions with other industries) and ...

Each solar facility included in the tracker, as well as each country/area with distributed solar capacities, is linked to a wiki page on the GEM wiki. The most ...

The U.S. Large-Scale Solar Photovoltaic Database provides the locations and array boundaries of U.S. photovoltaic facilities, with capacity of 1 megawatt or more.
