Understanding these variations helps in planning solar installations for maximum efficiency. In this blog, we'll explore the average peak sun hours per day in ...

“Solar isn't just about saving shillings - it's about securing Mombasa's future. Every panel installed reduces our reliance on diesel generators by 8 barrels annually.”

We initially installed a 100 kWp rooftop solar system and plan to upgrade in the near future. Orb's professional team completed the installation on time and kept ...

The recent USE Results Workshop reviewed the feasibility of solar PV systems and energy efficiency improvements in Mombasa, recommending ...

In the following list by days you can know the forecast of the predicted solar radiation. If you have a solar panel system, these data will be useful to predict the energy it will produce.

Kenya's solar energy production has demonstrated remarkable growth from the 2020/21 financial year through 2024/25. In the initial period of ...

The project has two sites one in Mombasa 14.5 MW and one in Nairobi 5MW that is delivering power to Bamburi Cement Plants. The Project is in operation. Froniter Energy II is the sole shareholder in the ...

Below is the average daily output per kW of Solar PV installed for each season, along with the ideal solar panel tilt angles calculated for various locations in Kenya.

Do you want to estimate the solar electricity production of your solar panels before investing in a photovoltaic system? PVGIS provides you with a detailed and precise simulation of your solar yield, ...
