Overview Performance and degradation Etymology History Solar cells Manufacturing of PV systems Economics Growth Module performance is generally rated under standard test conditions (STC): irradiance of 1,000 W/m, solar spectrum of AM 1.5 and module temperature at 25 °C. The actual voltage and current output of the module changes as lighting, temperature and load conditions change, so there is never one specific voltage at which the module operates. Performance varies depending on geographic location, time of day, the da...
