Need help? Do you have a question about the Mobile Broadband and is the answer not in the manual?

Overview and benefits Standardised architectures Air interfaces Issues Deployment Retirement In telecommunications, a femtocell is a small, low-power cellular base station, typically designed for use in a home or small business. A broader term which is more widespread in the industry is small cell, with femtocell as a subset. It typically connects to the service provider's network via the Internet through a wired broadband link (such as DSL or cable); current designs typically support four to eight simultaneously active ...

After linking the remote controller with the D-RTK 2 mobile station, tap Link with Aircraft in the pop-up window to link with the aircraft. Then press the Link button on the aircraft to finish linking.
