The inverter adjusts Q/S (the ratio of the output reactive power to apparent power) in real time based on U/Un (%) (the ratio of the actual power grid voltage to the rated power grid voltage).

Specifies the time for filtering the grid voltage in the PF-U curve. Specifies the power factor of the inverter. Specifies the reactive power output by the inverter.

For some power grid types, if the output side of the inverter is connected to an isolation transformer, ensure that the inverter is properly grounded and set Phase-to-ground short-circuit protection to ...
