Italy's new provisions state that fiscal credits can be awarded to PV project developers that use solar panels produced in the European Union with module efficiency ratings of more than ...

Katja Wünschel, CEO RWE Renewables Europe & Australia: « Busy times for our construction teams in Italy: three onshore wind farms, one solar park and six Agri-PV projects are ...

HJT technology provides high performance and low degradation of the module, substantially improving the solar cell solution and guaranteeing long PV module life cycle. Total investment amounts to ...

y Project summary The TANGO project will develop an industrial-scale pilot line in the South of Italy for the manufacture of innovative, high-performance photovoltaic (PV) modules, increasing production ...

The Italian photovoltaic (PV) park will be installed in Castellammare, Sicily. Qair won the project in the 16th tender of the FER 1 Decree incentive ...

3SUN highlights its efforts to scale up HJT cell and module production to 3 GW in Italy at TaiyangNews conference. Click here to learn more.

The FENICE project is a groundbreaking initiative, as it will introduce the production of photovoltaic modules based on advanced technologies like n-type and xBC ...

Localized production and advanced solutions for Europe With regard to localized production in Europe, our goal is to promote the local manufacturing of Huasun's high-efficiency HJT ...

For PV projects exceeding 1 MW in size, the Italian government excluded the use of solar modules, cells, and inverters from China. The auction concluded with an average final price of...

RWE is accelerating its renewable expansion in Italy: After starting construction of 112 megawatts (MW) of

Italian Jianneng solar Module Project

wind and solar projects in 2025, the company has now kicked off 123 MW in ...
