-----

Stellantis has opened its first battery technology centre at its Mirafiori plant in Turin. There, development teams will develop and test battery packs, ...

There is the laboratory for testing the electric axis, the one for the electric motor, the one for the inverter, and the test room to measure battery pack performance.

With ISO/IEC 17025 laboratory accreditation, lithium battery expertise and over 30 years' experience of the requirements and test methods of vehicle manufacturers, we can meet all your battery testing ...

The center can test up to 47 battery packs in parallel. Designed for future growth, the technology center's power system can manage up to 1.2 kilovolts (kV) and 2.2 megawatts (MW) per ...

Beyond automotive applications, the Italy Battery Test Systems market is expanding into sectors such as renewable energy storage, consumer electronics, and industrial machinery.

Featuring the latest technologies for battery and energy storage systems testing, paired with unrivalled industry expertise, this new centre of excellence will meet industry's increasing need ...

Discover cutting-edge testing facilities at Nard&#242; Technical Center. Designed for advanced vehicle development, from battery testing to noise lab.

The center can test up to 47 battery packs in parallel. Designed for future growth, the technology center's power system can manage up to 1.2 ...

Soluzioni per il testing e la certificazione delle batterie agli ioni di litio, inclusi servizi completi per valutare sicurezza e prestazioni durante il trasporto e l'utilizzo ...
