There is a critical need for stable, base-load power generation in Kosovo to meet demand. While power shortages and outages have become less frequent, they still occur when generation ...

While the increase of the solar PV installed capacity limitation marks a crucial step in the evolution of solar energy utilization in Kosovo, it is still insufficient, especially for industrial and large ...

A photovoltaic system is being built on the areas where ash from the two coal-fired power plants at Kosovo A was previously deposited. It will have an installed capacity of up to 100 MW and produce ...

To increase the production of renewable energy and reduce the environmental impact of the coal operations for power generation in Kosovo

A practical guide to Kosovo's industrial energy landscape. Understand grid instability risks from KEDS and discover how on-site solar can protect your ...

Your technical partner for solar scale-ups in Southeast Europe. We are on a mission to accelerate the transition to clean energy across Southeast Europe and globally by delivering technically robust, ...

The overall objective of this activity is to support the Government of Kosovo (GoK) and USAID in assessing the potential to expand renewable energy source (RES), focusing particularly on solar ...

Solarvance provides efficient, cost-effective solar and storage solutions optimized for Kosovo's continental climate. Our systems deliver reliable performance, helping homes, businesses, and ...
