The UBS report headed "Here we go again, for the 3rd lithium price cycle" is the latest in a series of investment bank reports into the latest lithium revival.

A boom in battery storage has bolstered the demand outlook for lithium in 2026, driving hopes for an accelerated turnaround for an industry ...

Global battery energy storage systems, or BESS, rose 40 GW in 2023, nearly doubling the total increase in capacity observed in the previous year, according to a special report published ...

The U.S. energy storage industry has entered a "new phase of sustained, high-volume deployment," according to the inaugural Energy Storage Market Outlook Q1 2026 released by the ...

U.S. energy storage deployments across all segments are expected to reach 12.7 GW/36.7 GWh for full-year 2024, up 42% on a GW basis and 35% ...

Supply Chain Threat of PRC Influence for Digital Energy Infrastructure: Evaluating the Technical Risk Landscape 55 Grid and Utility ...

China's electrochemical energy storage industry saw explosive growth in 2024, with total installed capacity more than doubling year-on-year, according ...

Battery storage in the power sector was the fastest growing energy technology in 2023 that was commercially available, with deployment more than doubling year-on-year.

The quarterly ESMO report tracks energy storage developments across multiple battery chemistries, including lithium-ion, sodium-ion, zinc-based, metal-air, and flow batteries. It also ...
