LONGi module product model comparison to help you quickly make product selections.

So, LONGi's solar panels suffer less damage and last longer. Most panels use Boron-doped P-type silicon wafers, and these degrade faster, with 83% power retention after 25 years.

Their double-sided design and durability provide better long-term performance, but higher upfront costs and specific installation requirements may ...

Bifacial solar panels produce solar power from both sides and deliver up to 30% more energy, but are they worth it? Let's find out.

For residential projects, bifacial panels can be effective with ...

LONGi panels carry performance warranties of up to 30 years, guaranteeing approximately 89.3% output at warranty end. Most solar panels continue producing useful energy for ...

With the increased stability of Gallium-doped silicon, LONGi is able to reduce the LID effects over the first year to 2% and less than 0.5% per year ...

Increased Energy Production: Bifacial panels generate 5-30% more power by capturing sunlight from both sides, including reflected light from snow-covered ...

Two downsides of LONGi solar panels include their high-temperature coefficient and the less-than-impressive product warranty, but it's ultimately up to you to ...
