As solar energy adoption continues to rise, we can expect further updates to building codes that will help create a more efficient, safe, and ...

The revised Energy Performance of Buildings Directive will speed up the uptake of solar photovoltaics and solar thermal - both on residential and non-residential ...

State Solar Carve-Out ProgramsSolar Interconnection Standards & PoliciesUnderstanding Electricity Market Frameworks & PoliciesInterconnection standards define how a distributed generation system, such as solar photovoltaics (PVs), can connect to the grid. In some areas of the United States, the interconnection process lacks consistent parameters and procedures for connecting to the grid or is unnecessarily complex. This drives up costs and causes delays, which can be sign...See more on [epa.gov](https://www.epa.gov)Building America Solution CenterInstallation of Photovoltaic Systems - Code Compliance BriefThis helps ensure future installation of a solar energy system is not precluded by the original design and layout of the building and its associated equipment. The following sections list the applicable code ...

The safe and reliable installation of photovoltaic (PV) solar energy systems and their integration with the nation's electric grid requires timely development of the ...

It is intended to minimize permitting uncertainty and differing interpretation regarding specific code requirements for solar PV installations.

California's Energy Code mandates solar photovoltaic (PV) systems for all newly constructed low-rise residential buildings. This requirement became effective on January 1, 2020, ...

Learn how to navigate solar project regulations, obtain permits, and comply with local building codes. Expert guide to streamline your solar installation.

New Regulations on Solar Energy System Building Design

These codes, which encompass structural, electrical, fire safety, and zoning regulations, provide a comprehensive framework for the proper design, ...

Section 140.10 (a) -PDF of the 2025 Energy Code requires solar photovoltaic (PV) systems for all newly constructed nonresidential buildings, with five exceptions (see below).
