Get the latest grid-connected wind turbine news, the world's largest energy industry marketplace and information resource.

Installed in waters off the southeastern Fujian Province, the unit is now the largest single offshore wind turbine ever brought online anywhere around the world. The commissioning marked...

The first generation of commercial grid connected wind turbines in the 1980s was dominated by the fixed speed concept mainly using asynchronous induction generators, which ...

In this article, we'll explore how wind turbines are connected to the power grid, the components involved in this process, and the challenges and solutions related to this integration.

This new generation of powerful offshore grid connection systems is set to speed up the integration of large-scale offshore wind energy into the ...

At 14:30 on July 19, the world's first 16-megawatt ultra-large-capacity offshore wind turbine was successfully connected to the grid and began ...

Wind power could soon come from the sky as China has successfully tested a megawatt-class airborne turbine that generates electricity while hovering 2000 metres up.

The phase II project of Zhangpu wind farm, China's first offshore wind farm with the largest single-capacity turbines, was connected to the grid for power generation on Thursday.

In this work, we reviewed power quality issues in grid-connected distributed renewable energy generation systems. Power fluctuation and harmonic distortions emerge as the most critical ...

News release on wind turbine grid-connected power generation

SHANGHAI, June 11, 2024 /PRNewswire/ -- Envision Energy has announced a pivotal achievement in the renewable energy industry with the successful grid ...
