---

We process PVDF at all our injection molding locations worldwide with state of the art machine, plant and mold technology that ensures excellent product properties of the finished PVDF components. In ...

We have been committed to manufacturing industry since 2006. Our customers are global and we succeeded in huge projects ever since. The mold we build is cost ...

Supported by the appropriate infrastructure, the injection molding machine and the robot are being powered directly by solar energy via a DC link. The two partner companies have jointly ...

The PVDF-based backsheets examined in this study were extracted from PV modules (fielded modules), mini-modules (C-AST and MAST), and laminated coupons (single-stress tests and ...

In this work, for the first time, the large-scale fabrication of organic photovoltaic modules embedded into structural plastic parts through industrial injection molding is demonstrated.

Pexco specializes in injection molding fluoropolymers including FEP, PFA, UHP PFA, PVDF, and ETFE for medical, pharmaceutical, semiconductor, and chemical processing applications requiring extreme ...

Kynar®; PVDF processing guidelines for pipe and tube extrusion and injection molding, including safety precautions.

From prototyping to production, our production sites can handle all your manufacturing projects.
