-----

Our solar ballast blocks are poured to your specifications to prevent movement and overturning of solar panel systems. Our ballast blocks are ...

Solar arrays are being installed worldwide to diversify energy supply and reduce dependence on fossil fuels. Faddis is catering to rising demand by making precast concrete ballasts, also ...

A solar ballast system is an engineered mounting solution that utilizes calculated weight distribution--typically concrete blocks or ...

The ballast-supported foundations are analyzed for eight systems by proposing two separate ballast designs: one for a single line of post systems, and one for a double line of ...

Solar racks made simple. Appropedia guides DIY builders through ballast-supported designs that avoid concrete and reduce cost.

We have relied on Sun Ballast for quite some time to supply concrete supports for the photovoltaic systems we build. By working with their professionals--who are serious and ...

Two different designs for both fixed tilt and variable tilt PV racking are investigated to assess their structural integrity, constructability, and economic cost when fabricated with a...

These durable, easy-to-install blocks are designed specifically to keep solar arrays firmly in place, providing a strong foundation that ...

Concrete solar ballast units are used for flat ground and roof-mounted applications requiring ballast weight to secure panel arrays and provide the dispersion of point loads without the ...
