What Is Battery discharge? Battery Discharge During Idle Status? Explanation Discharge Curve Battery Discharge Characteristics A battery is an electrical component that is designed to store electrical charge (or in other words - electric current) within it. Whenever a load is connected to the battery, it draws current from the battery, resulting in battery discharge. Battery discharge could be understood to be a phenomenon in which the battery gets depleted of its charge. ... See more on sinovoltaics Published: Jul 7, 2015.
