-----

Shaded cells of a solar panel interrupt the energy flow in the grid, which forces other cells work harder to compensate for the loss. It ...

From micro-scratches that slowly decrease efficiency to large-scale accidents that immediately cut off power generation, so much can go wrong and with little warning. Here are ...

Blocking Diode in a solar panel is used to prevent the batteries from draining or discharging back through the PV cells inside the solar ...

These common solar panel defects are hard to see without special equipment but can get worse over time due to weather changes. ...

Blocking diodes prevent the reverse flow of current from the battery back into the solar panel. This reverse flow can occur at night when there is no ...

You've probably wondered: "Will my solar panels really lose power if a tree branch shadows just one cell?" Well, the short answer is yes - but the full explanation might surprise you.

Understand the most common solar panel defects, their causes, symptoms, and prevention tips to ensure optimal performance ...

Here are 11 of the most common solar panel defects to watch out for in a solar installation, and how WINAICO works to prevent them ...
