Currently, solar energy accounts for 20.7% of Brazil's installed electricity capacity, making it the country's second-largest energy source.

Learn more about Brazil's rise in the renewable sector, including its top PV plants and the future of its solar energy market.

The country ended 2022 with 24 gigawatts (GW) of solar PV operating power and took, for the first time, eighth place in the international ...

Data and analysis including a list of solar power in every country in the world, countries with the most solar power, and countries that generate the ...

The total installed solar power in Brazil was estimated at 53.9 GW at February 2025, which consists of about 21.9% of the country's electricity matrix. In 2023, Brazil was the 6th country in the world in terms of installed solar power capacity (37.4 GW). Brazil expects to have 1.2 million solar power generation systems in the year 2024. Solar energy has great potential in Brazil, with the country having one of the highest ...

Brazil was ranked 14th in the world in terms of installed solar power in 2020. (7.8 GW). In May 2021, Brazil's total installed solar power was anticipated to be around 9.4 GW, generating roughly 1.46 ...

Solar energy in Brazil surpassed the 55 GW milestone in March 2025, more than doubling its photovoltaic (PV) count in the last few years. That breakneck ...

The Brazilian photovoltaic sector recorded significant advances in 2024, with emphasis on the operational performance of several solar parks, according to the "Wind and Solar Operational ...

Listed below are the five largest active solar PV power plants by capacity in Brazil, according to GlobalData's power plants database. GlobalData uses proprietary data and analytics to ...
