---

China is by far the largest installer of wind power in the world, more than tripling the second-ranked United States. As of the end of 2024, China had ...

Renewable energy statistics 2025 provides datasets on power-generation capacity for 2015-2024, actual power generation for 2015-2023 and renewable energy balances for over 150 countries and areas for ...

Cumulative installed wind energy capacity including both onshore and offshore wind sources, measured in gigawatts (GW).

Here is the list of world's leading renewable energy generating countries in the world. 1. China is a global leader in wind energy generation. The ...

The United States is the second-largest producer of wind power, and ...

This visual shows the top 15 countries by total installed wind turbine capacity, based on data from the Energy Institute's 2025 Statistical Review of ...

International Rankings of Cumulative Wind Power Capacity Committed to Restoring America's Energy Dominance.

The world's installed wind power capacity now meets well over 10% of global electricity demand - and much more than nuclear power. More than 30 countries now have a share of wind ...

The Global Wind Power Tracker (GWPT) is a worldwide dataset of utility-scale, on and offshore wind facilities. It includes wind farm phases with capacities of 10 ...
