If ABC Company accepts, some of its facilities presently used to manufacture this part could be used to help with the manufacture of the same part, thus saving ...

These prefabricated, scalable units are transforming traditional refining processes by offering flexibility and speed. As the demand for localized and smaller-scale refining options grows,...

A coker or coker unit is an oil refinery processing unit that converts the residual oil from the vacuum distillation column into low molecular weight hydrocarbon gases, naphtha, light and heavy gas oils, and petroleum coke. The process thermally cracks the long chain hydrocarbon molecules in the residual oil feed into shorter chain molecules leaving behind the excess carbon in the form of petroleum coke. This petroleum coke can either be fuel grade (high in sulphur and metals) or anode grade (low in sulp...

COLLAPSECON containers are collapsed at speed by the COLLAPSECON Operating Station, the only automated solution on the market. It is designed to seamlessly integrate into operations at scale, ...
