-----

Portugal is firmly committed to achieving carbon neutrality by 2050. A cornerstone of this strategy is the integration of Battery Energy Storage ...

The Portuguese government plans to invest up to 400 million euros (\$466 million) to improve grid management and boost battery storage following ...

Portugal's energy-storage market is entering a new stage of maturity, combining grid-scale standalone batteries and hybrid (co-located) systems with renewable plants.

Portugal's government has announced the outcome of an energy storage tender that will see the installation of 500 MW of energy storage ...

Storage can replace thermal generation in constraint markets, easing the grid and supporting Portugal's 2040 phase-out target. Storage facilities can effectively deliver essential voltage and frequency ...

Portugal will launch a competitive tender for 750 MVA of battery energy storage before January 2026, as part of a broader EUR400 million package ...

The batteries will allow Galp to store the solar energy produced in periods of high generation, and to deploy it during periods of high demand, maximizing the ...

The renewable energy landscape in Portugal is moving into a new phase, marked by stronger commitments from international investors and the ...

Portugal's battery storage boom steadies prices, slashes blackouts and opens tech roles. Discover how new policies could reshape your power bill.

Combining storage with solar generation strengthens the operational efficiency and resilience of our assets
