Rocksavage is a highly flexible combined cycle natural gas fired power plant located in the north west of England some 20 miles south east of Liverpool. It ...

Operating and maintaining the Rocksavage combined cycle natural gas fired power plant in the north west of England. Generating electricity with a capacity of 810MW. Providing power to meet the needs ...

Rocksavage Power Station is a combined cycle natural gas-fired power plant in England, just southeast of Liverpool. It has a generating capacity ...

Sources All Source Types Renewables Low Carbon Fossil Fuels Interconnects All Sources Biomass CCGT (Gas) Coal Hydroelectric Nuclear ...

Rocksavage Power Station is an 800 MWe gas-fired power station in Runcorn, off the A557, at the junction of the River Weaver and River Mersey, and near junction 12 of the M56.

It is a CCGT-type power station that uses natural gas. It has two Alstom 260MWe GT26A gas turbines, with an Alstom heat recovery steam generator each that produces steam for one ABB 280MWe steam turbine. The plant runs at 58% thermal efficiency. 300MWe is used by the Ineos site (previously ICI) at Weston Point that makes hydrofluorocarbons (HFCs), and the other 400MWe is sold by Scottish and Southern Energy (formerly Scottish Hydro) for electricity supply.

Plans for a low carbon power plant with the potential to become carbon neutral by 2028 have been unveiled. The gas-fired Rocksavage facility in ...

Rocksavage Power Station is an 810MW gas fired power project. It is located in England, the UK. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the ...

Rocksavage power station is an operating power station of at least 810-megawatts (MW) in Runcorn,

Rocksavage power plant

Rocksavage Power Station, in Runcorn, Cheshire, is an 800 MW combined-cycle gas turbine (CCGT) plant near the junction of the River Weaver and River ...
