Romania is on its way to becoming a significant regional player in renewable energy, demonstrating its commitment to the global energy transition. Investments and projected developments present ...

Our team is specialised in identifying and developing medium to large scale photovoltaic energy power plant sites and stand-alone storage installations. The ...

The Danish developer intends to deploy a 117 MWh energy storage unit with lithium-iron-phosphate (LFP) batteries, within a year. It valued the ...

The Romanian State supports the production of solar / PV energy by offering six (6) green certificates for each MWh produced and injected into the grid.

By the end of this decade, Romania aims to reach 10 GW of solar and 4 GW of storage. A local clean energy value chain is beginning to take shape--early signs of a more integrated, resilient solar industry.

The project attempts to assess the current technical potential, regulatory framework, and estimated investment needs for commercially mature energy storage facilities in Romania, while also analysing ...

This study comprehensively reveals the real energy profile of a metro station on an hourly scale and establishes a multi-objective model to investigate the energy flexibility of the metro station ...

FTMRS SOLAR specializes in photovoltaic power generation, solar energy systems, lithium battery storage, photovoltaic containers, BESS systems, commercial storage, industrial storage, PV ...

The renewable energy sector in Romania is at an exciting crossroads, with the country looking to address both domestic energy demand and international ...
