It shows excellent activity and durability for both ORR and OER, with a small potential gap of 0.70 V at 10 mA cm². When integrated into rechargeable zinc-air batteries, it exhibits ...

2026 - Volume 22, Small Volume 22, Issue 12 Special Issue: Advanced Energy and Functional Materials 25 February 2026

Small provides the very best forum for experimental and theoretical studies of fundamental and applied interdisciplinary research at these dimensions. Read an attractive mix of peer-reviewed Research ...

After 36 h aging at 500 °C, small active area diodes retain a sensitivity of 1.65 mV °C⁻¹ with high linearity ($R^2 > 0.999$). Meanwhile, the degradation mechanism of large active area diodes ...

Besides, the synergetic interaction of multiple cations effectively alleviates the structural degradation and thus NVMP-HE cathode shows highly reversible structure evolution and small ...

This issue marks the start of the 20th anniversary of Small. In the last 20 years, Small has grown to become an essential journal providing the very best forum for fundamental and ...

Manuscript Submission Free Format Submission We now offer Free Format submission for a simplified and streamlined process for New Submissions. Before you submit, you will need: Your manuscript: ...

Small Methods is a nanoscience & nanotechnology journal focusing on significant advances in methods applicable to nano- and microscale research.

Small is a nanoscience & nanotechnology journal providing the very best forum for fundamental and interdisciplinary applied research at the nano- and microscale, covering chemistry, energy, physical ...
