The Electric Power Research Institute (EPRI) conducts research, development, and demonstration projects for the benefit of the public in the United States and internationally.

NLR's solar energy research includes next-generation solar technologies for national security applications and emerging industries as well as photovoltaic performance, reliability, and ...

The Future of Solar Energy considers only the two widely recognized classes of technologies for converting solar energy into electricity -- photovoltaics (PV) ...

The identified research work has been characterized according to the solar power technology reviewed, methodology adopted and the sustainability parameters discussion.

CEPRI is a comprehensive and multi-disciplinary research institute affiliated to SGCC.

Our solutions improve the efficiency for conventional power generation using coal and natural gas, and we help integrate renewable resources such as solar and wind power. Our work in battery ...

The Electric Power Research Institute (EPRI) is working with five utilities to design, develop, and demonstrate technology for end-to-end grid integration of energy storage (ES) and load management ...
