This report explores the current policy landscape for distributed solar PV in Ukraine and outlines three potential policy options to accelerate the deployment of this ...

The 1.5 GW represents substantial growth in Ukraine's solar market, after around 800 MW was added in 2024, and takes cumulative capacity to in excess of 8.5 GW.

This citizen-led movement has been so impactful that residential solar surpasses 1.5 GW in Ukraine, providing a critical lifeline during grid failures. This dramatic increase in solar installations ...

We believe that exchanging experience with European partners can accelerate Ukraine's transition to 100% renewables. Every story, every publication is a contribution to our shared cause, ...

As part of the campaign, SolarPower Europe members, the Energy Act for Ukraine, Foundation, ABO Wind, Akuo, and Deye, a non-SolarPower Europe member and inverter manufacturer, jointly ...

Discover 8 groundbreaking solar and wind energy projects shaping Ukraine's future, boosting clean energy, and leading its green transformation.

We represent the interests of owners of industrial solar power plants, Ukrainian and foreign investors, companies engaged in the design, construction and ...

Since the full-scale invasion began in February 2022, Ukraine's energy sector has been a major target of attacks. Approximately 30% of all solar PV capacity has been affected<sup>3</sup> as of mid-2024, much of ...

The report analyses how to accelerate the deployment of distributed solar photovoltaic systems in Ukraine to strengthen energy security and advance decarbonisation.
