---

The planned factory is set to have an annual production capacity of 3.7 gigawatts (GW) of solar modules, marking a major step in ...

The United States is now the third-largest solar module manufacturer in the world, and more growth is on the way. Clean Energy ...

In August 2025, the global photovoltaic industry witnessed a wave of intensive capacity expansion across Southeast and South Asia.

The Cartersville factory -- one of the pillars of Hanwha Qcells' U.S.-based integrated solar power production complex, the Solar ...

In 2020, SEIA set a goal for 50 GW of U.S. solar manufacturing capacity by 2030, equivalent to the power output from 27 Hoover Dams. This bold target focuses on all levels of the solar ...

The new facility will span over one million square feet and is designed for the production of First Solar's Series 7 thin-film solar modules.

The current US solar manufacturing ecosystem represents a comprehensive network of production capabilities that extends far beyond ...

A new economic impact study released by First Solar, Inc. estimates that the company will operate approximately 18 gigawatts (GW) of annual nameplate solar module ...

The production lines include 2GW of solar cell capacity and 3GW of solar module production to supply utility, commercial, and industrial clients. The manufacturing process ...

# Solar module production capacity expansion project

Mission Solar Energy is strengthening America's solar supply chain with a major investment in domestic manufacturing, announcing ...
