The solar photovoltaic market size crossed USD 323.5 billion in 2025 and is expected to grow at a CAGR of 8.1% from 2026 to 2035, driven by integration of solar PV across agriculture and business ...

The IEA PVPS Trends in Photovoltaic Applications 2025 report provides comprehensive data and analysis on global PV deployment, technology, and ...

The International Energy Agency projects significant growth for photovoltaics (PV) in 2024 over the record-breaking year in 2023. Over the next ...

The Solar PV market shows moderate concentration: the top 10 module vendors shipped around 70% of volumes in 2025, yet power prices remain ...

The solar PV panels market is growing rapidly as global electricity demand increases and governments actively promote renewable energy and ...

Solar energy can be harnessed two primary ways: photovoltaics (PVs) are semiconductors that generate electricity directly from sunlight, while solar ...

Global solar installations reached nearly 600 GW - an impressive 33% increase over the previous year - setting yet another record. Solar accounted for 81% of all new renewable energy ...

News from the photovoltaic and storage industry: market trends, technological advancements, expert commentary, and more.

Photovoltaic (PV) solar accounted for 58% of all new electricity-generating capacity additions through the third quarter of 2025, remaining the dominant form of new electricity-generating ...
