Solar Cells Hellas specializes in the production of photovoltaic components, including solar cells and modules, with a significant annual capacity of 80MW. The company also provides comprehensive ...

solar power, solar panels, solar modules, energy from sun, greek installation company, photovoltaics

Brite Solar is making history with the launch of its new factory in the Patras Industrial Zone, home to the world's first production line for semi-transparent solar panels with advanced ...

HelioSphera S.A. is a Greek company founded in 2007, with major stakeholders in Greece and the United States of America. Its headquarters is in Athens, Greece, and its production facility is in Tripoli, Greece. The company's primary product was photovoltaic solar panels and modules, made of micromorph thin-film with an annual capacity of 60MWp. The company ceased production in 2012 after falling victim to Chinese competition and it was declared bankrupt in 2017.
