This guide offers a framework for evaluating potential factory sites across Vanuatu, focusing on the critical infrastructure criteria that extend beyond the primary business hub of Efate.

Explore our range of solar panels, inverters, and systems designed for maximum efficiency and sustainability.

Discover how solar panel manufacturing in Vanuatu is transforming energy access across the Pacific. This article explores factory operations, renewable energy trends, and how localized production ...

This ambitious project will be situated on the Kawene plateau in Efate, adjacent to the existing wind farm and solar facility, making it the largest solar farm in the country. The ...

If you can adjust the tilt angle of your solar PV panels, please refer to the seasonal tilt angles below for optimal solar energy production in Port Vila, Vanuatu.

AusPac Solar provides the unique solution such as the Bluetti...

This project is aligned to the Government of Vanuatu's National Energy Road Map for increasing the energy access for rural communities in Vanuatu. The installed solar PV system is a stand-alone ...

Summary: Discover how Vanuatu's solar photovoltaic systems are transforming energy access across 80+ islands. This guide covers cost-saving strategies, real-world success stories, and emerging ...

With the remoteness of the islands and limited access to centralised utilities, PCS also offers self supporting products suitable for the Vanuatu environment, including solar showers, hand spears, ...

The first grid-connected photovoltaic farm in Vanuatu was installed on the roof of our dock workshop in Tagabe. With a nominal power of 81 kWp, it was commissioned in May 2011.
