-----

Long before the first Earth Day was celebrated on April 22, 1970, generating awareness about the environment and support for environmental protection, ...

At the International Space Station, astronauts begin installing solar panels on what will be the largest solar power array deployed in space. Each "wing" of the array consists of 32,800 solar cells.

The invention of solar panels dates back to the 19th century when the photovoltaic effect was first discovered. This effect, which involves the generation of an electric current when certain ...

Researchers discovered a new way organic molecules can mimic the quantum mechanics of inorganic materials, turning light into electricity with ...

Discover the fascinating 180-year history of solar panel invention and the broader history of solar energy, from Edmond Becquerel's 1839 ...

With the way the cost of solar has plummeted in the past decade, ...

Charles Fritts was the first person to generate electricity using solar panels--in 1884--but it would be another 70 years before they became efficient ...

In 1839, French physicist Edmond Becquerel observed that certain ...

In the 19th century, it was observed that the sunlight striking certain materials generates detectable electric current - the photoelectric effect. This discovery ...
