-----

CAPE CANAVERAL, Fla. (AP) -- Astronomers have discovered the earliest seeds of rocky planets forming in the gas around a baby sun-like star, ...

Now, a new study might upend that idea, suggesting the universe's expansion is actually slowing down--and that dark energy is ...

These devices play a crucial role in bridging solar power generation with energy storage solutions, especially when paired with lithium batteries. ...

SPHERE's dazzling dust images unveil the chaotic, planet-shaping architecture of young solar systems.

Fortunately, there is a rich source of empirical data that records the evolution of Solar System dynamics in ways that are sensitive to the spin rate of the Earth and therefore ...

Overview  
Definition  
Formation and evolution  
General characteristics  
Sun  
Inner Solar System  
Outer Solar System  
Trans-Neptunian region  
The Solar System is the gravitationally bound system of the Sun and the masses that orbit it, most prominently its eight planets, of which Earth is one. The system formed about 4.6 billion years ago when a dense region of a molecular cloud collapsed, creating the Sun and a protoplanetary disc from which the orbiting bodies assembled. Inside the Sun's core hydrogen is fused into helium for billion...

This new discovery suggests a complex structure at the edge of the Solar System, challenging our understanding of its formation. The ...

The New Horizons spacecraft has been heading out deeper into the Solar System since its flyby of Pluto in 2015; at time of writing, the ...

The implications of a faster-than-expected solar system could lead to a major shake-up in how we view the

cosmos, from the distribution ...

## Solar system deepening
